Product Profile & User References

Statistics show that ear infections are the number one reason why dog owners visit the vet. It often takes multiple visits to eliminate the problem which is not only frustrating (for both dog and owner) but it's also very expensive.

The best way to prevent a dog's ear infection is to start a regular home cleaning regimen. This not only helps to stop infections before they start but it also keeps the owner in tune with the condition of the dog's ears.

To help dog owners combat ear infections happytails has created Ear Aid, a dual-action program that works to clean, deodorize, and protect a dog's ears. It's easy to use, all natural, highly effective and extremely affordable!

The program consists of two steps. The first is an external cleaning of the ears and the second is a serum that goes into the ear canal to heal delicate tissue and protect from bacteria.

Step One: Clean and Deodorize

Ear Wipes are a convenient way to clean your dog's delicate ears. The pre-moistened pads contain colloidal silver, an all natural ingredient that suppresses bacteria, and witch hazel, which has been used for generations to safely cleanse and sanitize. Our botanical blend gets rid of dirt, wax and debris while reducing unpleasant odors.

Step Two: Heal and Protect

A few drops of this antibacterial/antimicrobial formula will break down wax buildup that can often be a breeding ground for infections. Ear Clear contains amica and chaparral oils to decrease the pain and discomfort caused by swelling. It also contains organic comfrey and calendula which soothes, heals and protects. Add a touch of essential oil of lavender to remove unpleasant odors and you have a complete solution for ear health.

We couldn't be happier with the products

USER REFERENCE

We live in Denver, one of the most dog-friendly communities you'll find on the planet, and as such we are blessed to have a world of options in helping us provide proper care and pampering for the four-legged members of the unit.

However, in finding Happy Tails Spa, we no longer search for the proper answers. Now, those answers come right to our doorstep. Happy Tails Spa specializes in problem-solving products for the modern dog. As any dog owner can attest, the needs and demands of maintaining a healthy pooch are significantly different than those of a human. It takes a focused approach to design and production to create products that will provide quality, reliable care and maintenance for our beloved canines. Happy Tails Spa understands these needs and offers an astounding menu of products to address those specific needs for your family.

We have an English Bulldog in our home. Trixie is special in so many ways, but as anyone owning an English Bulldog can attest, the care and resulting needs associated with raising such a dog fall on the extreme end of the dog-care spectrum. There are "special" traits and bodily functions (to put it nicely) associated with English Bulldogs that require special care and efforts in hygiene and maintenance. Other breeds of dog also present special circumstances, and we have found Happy Tails Spa provides any and everything we could need to keep up with the game. We are particular enamored with two products sent to us by HTS, including the Dog Smog Remedy and the Eyepads. Our dog battles, well, "environmental odor issues"... that's putting it nicely. Dog Smog Remedy provides an alternative option that allows the user to address these concerns at both ends of the dog!

THE STORY OF EAR AID

From the Owner of Happytails...

Late last year I noticed that one of my dog's— Brle was scratching her ears a lot and when I checked I saw a disgusting brown crust covering her swollen and irritated skin. My vet told me that this was one of the most common problems he sees and prescribed some medication for her. As we spoke he bemoaned the fact that he had yet to find an effective, all natural alternative that would work as well.

"All natural and effective" I thought, "sounds like a job for happytails"

I contacted our favorite formulator Mitch Coven and asked if he could come up with a solution. As we usually do, we went back and forth for a while. Realizing that both the inner and outer ear demanded different approaches we finally arrived at a two part solution. First Ear Wipes; pre-moistened pads infused with anti bacterial colloidal silver. which clean and disinfect the outer ear. Second; Ear Clear a vegetable oil based formula designed to reach deeper in the ear canal to clear away dirt, debris and wax and also help reduce swelling and infection.

The next time Bree developed the problem I was ready, not only did Ear Aid heal the infection quickly but it helped to ease her discomfort and irritation. Now I use the products every day to help prevent the problem from coming back.

Lorna Paxton, Owner Happytails

All-Natural Ingredients in All Happytails Products

combining fabulous scents with the finest botanical extracts

- Made in the U.S.A. in FDA-approved labs
- Certified cruelty-free products
- No parabens or sodium lauryl/laureth sulfates

Ear Wipes

Water

Hamamelis Virginiana (Witch Hazel) Leaf Extract A very gentle astringent that utilizes the all natural cleansing properties of tannins and volatile oils. Studies suggest that witch hazel strengthens veins and offers anti-inflammatory effects and is useful in relieving such skin conditions as eczema.

Colloidal Silver An effective broad-spectrum natural antibiotic that disables the enzyme that all viruses, fungi and one-celled bacteria use to metabolize oxygen. Colloidal silver leaves beneficial enzymes intact (Unlike pharmaceutical antibiotics which destroy them) and also soothes skin conditions and cleans eyes safely and thoroughly

Decyl Glucoside A biodegradable plant derived cleanser used to improve the "spreadability" of the liquid on the pad so that it better saturates the ear. Often used in products for babies and those with sensitive skin. It's an excellent substitute for SLS based surfactants. It's non-toxic and is non-irritating.

Glycerin A humectant (adds moisture to skin)

Echinacea Angustifolia Root Extract An antimicrobial and helps to relieve skin irritations

Citric Acid A crystal-like, colorless, organic acid that naturally occurs in citrus fruits. It's a natural preservative and also helps to adjust the pH of products to prevent them from being too alkaline..

Potassium Sorbate An FDA-approved, polyunsaturated fat that is used to inhibit microbial growth.

Lavandula Angustifolia (Lavender) Oil Not only has a pleasing scent and gentleness but it is also antibacterial and contains anti-itch properties.

Propanediol an organic hygroscopic liquid used as a humectant in cosmetics and personal care items

Calendula Officinalis Flower Extract An herb that brings soothing relief to delicate tissue while lending wound-healing antimicrobial properties. Also heals to soothe itchy skin.

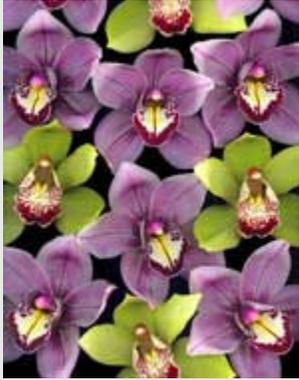

Comfrey Leaf (Symphytum Officinale) An herb that brings soothing relief to delicate tissue while lending wound-healing antimicrobial properties. Also heals to soothe itchy skin.

Larrea Mexicana (Chaparral) An antimicrobial herb that has been used for centuries. Althaea Officinalis (marshmallow) Root Extract- This sweet, mucilaginous herb has expectorant properties and also soothes and softens tissue, while controlling bacterial infections.

Verbascum Thapsus (Mullein) Extract This topical analgesic helps to reduce pain and discomfort from swelling.

Benzoic Acid employed in a wide range of preservative applications because of its combination of bactericidal and bacteriostatic action with non-toxicity and tastelessness. Very effective against yeast and mould.

Ear Clear

Extra Virgin Olive Oil Used as a demulcent ie: it forms a soothing film relieving minor pain and inflammation. It is also used at room temperature as an ear wax softener.

Lavender Oil Lavender not only has a pleasing scent but it is also antibacterial and contains anti-itch properties.

Calendula Flower Brings quick, soothing relief to delicate tissue while lending wound-healing antimicrobial properties. Also heals to soothe itchy skin. Organic.

Comfrey Leaf Brings quick, soothing relief to delicate tissue while lending wound-healing antimicrobial properties. Also heals to soothe itchy skin. Organic.

Chaparral Leaf An antimicrobial herb that has been used for centuries. Wild Harvested.

Arnica Flower Helps increase circulation in order to help increase the body's ability to help heal the area and remove extra fluid buildup. This helps to decrease the pain from and ear infection.

Tea Tree Oil Contains constituents called terpenoids, which have been found to have antiseptic and antifungal activity. The compound terpinen-4-oil is the most abundant and is thought to be responsible for most of tea tree oil's antimicrobial activity.

INSTRUCTIONS

First clean your dog's ears with Ear Wipes. Next apply 3-5 drops of Ear Clear into each ear canal. Close the dog's ear flap and massage gently. Repeat 2x per day for two weeks. If your dog is prone to ear infections, apply twice weekly as a preventative.
